About

I'm a passionate Full Stack Web Developer with hands-on experience building modern web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). I enjoy crafting seamless user experiences on the frontend and building scalable, secure backend systems.

Over the course of my learning and project journey, I've developed full-fledged applications that showcase the power of the MERN stack — from responsive user interfaces to robust RESTful APIs, real-time features, and secure authentication workflows.

Projects

Multi purpose form with pdf report

May '25

github.com/amarjeet-choudhary666/multi_purpose_from_With-reports-pdf | Multi purpose form with pdf report

- Multi-Purpose Form with PDF Report Generation – A dynamic form system that collects and validates user input for various use cases (e.g., feedback, applications, surveys). Built with React.js (frontend) and Node.js/Express.js (backend), with PostgreSQL/MySQL for secure data storage. Features real-time validation, role-based access, and automated PDF report generation for submissions using ReportLab / pdkit.

linkedin community mini

github.com/amarjeet-choudhary666/full_stack_linkedin_community_mini | full stack linkedin community mini

- Full Stack Store Rating Platform – A web application where users can rate registered stores (1–5 stars) with role-based access. Built with React.js (frontend), Express.js(backend), and PostgreSQL(database). Includes single login system, admin dashboard to manage stores, and user dashboard to submit & view ratings.

AI Task Management Todo App

github.com/amarjeet-choudhary666/full_stack_ai_task_manager | AI Task Management Todo App integrated with gemini using rela time data with postgresql and drizzle

- An intelligent and intuitive AI-powered Todo App designed to enhance productivity and streamline daily task management. This app blends modern frontend design with smart backend automation using AI to help users not just manage tasks, but complete them smarter and faster gemini integration.

Imagfe driver for storing image

github.com/amarjeet-choudhary666/Image_drive | Imagfe driver for storing image

- Project like google drive with nested NestDrive is a full-stack web application inspired by Google Drive that allows users to create ****nested folders****, ****upload images****, and ****search files by name****. Built with a modern tech stack, NestDrive delivers a clean UI, secure authentication, and powerful folder management logic.

CSV Data distributor MERN full stack project

github.com/amarjeet-choudhary666/csv_mern_stack_project | CSV Data distributor MERN full stack project to agents

- CSV Data Distributor for Agents is a full-stack MERN application that allows admins to upload CSV files, map and manage the data, and automatically distribute rows to assigned agents based on rules or manual selection. It's designed for organizations that need to delegate structured data (like leads, tickets, or tasks) efficiently to a team of agents.

EV station finder and booking app

github.com/amarjeet-choudhary666/ev_station_finder_and_booking_app | EV station finder and booking app backend using gin jwt bcrypt

- A backend project built using Go (Golang) that powers a platform for discovering EV charging stations and booking charging slots in real time. This service is designed to support scalable, efficient, and secure electric vehicle infrastructure for both users and station providers.

portfolio

portfolio-twinkl.vercel.app/ | AI-Enhanced Portfolio with Modern UI/UX & EmailJS Integration

- Built a sleek, responsive portfolio using ReactJS and Framer Motion with dynamic animations, intuitive layout, and EmailJS-powered contact form—designed to highlight clean UI/UX and frontend skills.

Skills

Technical skills: context api · zod · TypeScript/Javascript · bcrypt · jsonwebtoken · Authentication (JWT & OAuth) · Redis · Redux · Restful APIs · CSS · javascript · TailWindCSS · JavaScript Frameworks · ReactJs · Router · HTML5

Database: Mongo DB · PostgreSQL

ORM: Drizzle ORM · prisma · GORM · Mongoose

Framework: NextJS · Nest.js · Express · Go (Gin framework)

Programming languages: Javascript · TypeScript · GoLang

SERVICE: Git · AWS (Amazon Web Services) · Github · Cloudinary · Clerks

Backend env: Nodejs · golang
